## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on Jul 16, 2002.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.

Art Unit:

This is a request for continued examination of applicant's earlier Application No. 09491708. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

I. Applicant argues that prior art must show some suggestion or motivation to make instant invention. Applicant states that there exist no suggestion in Valcke on record for the creation of emusifiable concentrate formulation comprising metconazole plus alkoxylated alcohols.

A. Examiner disagrees with Applicant and restates that Valcke suggests the instant invention in accordance with the rejection below.

Art Unit:

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3,6-8,11,12,15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Valcke et al (US 5714507; 2/3/98).

Valcke et al discloses an emulsifiable concentrate comprising a compound of formula a1 (metconazole), an alkoxyated alcohol (polyethylene oxide with propylene glycol or nonylphenol polyethoxy ethanol), an aprotic solvent (methylpyrrolidone), silicone material (Silicic acid), and an anionic surfactant (dispersant). See column 1 line 22 - column 2 line 34, column 6 line 22 - column 7 line 36, column 9 lines 33-44. Valcke teaches that the composition can exist as a non aqueous concentrate. See column 6 lines 13-44. Valcke teaches that the composition is employed in a method of combating fungi which comprises the application of the composition to fungi loci. See abstract. Valcke does not teach the composition comprising a) an alkoxyated alcohol with the instant number of carbons and b) the instant amounts and ratios of components. One having ordinary skill in the art at the time the invention was made would have been expected to determine the optimum carbon number for the alkoxyated alcohol component as well as the optimum amounts and ratios of ingredients for the instant composition. One would have been motivated to do this so the composition developed would have been effective when employed in the method of controlling fungal growth.
